

Apologia Biology Module 12: Phylum Arthropoda

Vocabulary from Module 12 of Exploring Creation with Biology (2nd Ed.)

By Dr. Jay Wile and Marilyn F. Durnell

www.CrosswordWeaver.com

ACROSS

- 1 A body region composed of the head and thorax fused together
- 5 A _____ eye is an eye made of many lenses, each with a very limited scope.
- 10 A body covering, typically made of chitin, that provides support and protection
- 11 A _____ eye has only one lense.
- 12 Insect development consisting of three stages (egg, nymph, and adult) is called _____ metamorphosis.

DOWN

- 2 An _____ circulatory system allows blood to flow out of the blood vessels and into various body cavities so that the cells are in direct contact with the blood.
- 3 Insect development consisting of four stages (egg, larva, pupa, and adult) is called _____ metamorphosis.
- 4 The body region posterior to the thorax
- 6 To shed an old outer covering so that it can be replaced with a new one
- 7 The organ of balance in a crustacean
- 8 The body region between the head and the abdomen
- 9 A general term for the organ that produces gametes

Solution to "Phylum Arthropoda"
Exploring Creation with Biology (Vol. 2) - Module 12
