ACROSS

DOWN

- 6 An organism that eats secondary consumers is a _____ consumer.
- 7 A measure of the total dry mass of organisms within a particular region
- 9 The study of the interactions between living and nonliving things
- 10 An _____ pyramid is a diagram that shows the biomass of organisms at each trophic level.
- 11 An organism that eats primary consumers is a _____ consumer.
- 12 A group of interbreeding organisms coexisting together
- 13 A group of populations living and interacting in the same area
- 1 An ecosystem where all water runoff drains into a single body of water
- 2 Evaporation of water from the leaves of a plant
- 3 The process by which certain gases (principally water vapor, carbon dioxide, and methane) trap heat that would otherwise escape the earth and radiate into space is called the _____ effect.
- 4 A group of ecosystems classified by climate and plant life
- 5 An organism that eats producers is a _____ consumer.
- 8 An association of living organisms and their physical environment

Solution to "Ecology"
Exploring Creation with Biology (Vol. 2) - Module 10
